LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
③	③	②	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

Equity:
The Malaysian equity market closed the month slightly lower, as the big cap stocks succumbed to some sell down, despite the rising Brent crude oil prices and the tabling of Budget 2018. Increasing acceptance the US president's tax reform proposals and the potential change in the US Federal Reserve's ("Fed") chairperson temporarily made the global markets jittery. Banks underperformed especially those with regional exposure such as Maybank and CIMB. Results season for the 3Q is also underway, which have been generally in line. Tenaga reported decent results and increased their dividend as promised earlier. The Budget 2018 announcement on the 27th October was as expected, focused on implementing measures to increase households' disposable income, in particular the bottom 40% (B40) income group, with special cash payments to be made to the 1.6m civil servants and civil servant retirees. The FTSE Bursa Malaysia Index ("FBM") Shariah Emas Index ended the month higher at 2.23% mom to close at 13,082.7 points. The broader market gained by 0.53%, underperforming the FBM Shariah Emas Index. The best performing sectors were Technology (+6.56%) and Plantation (+0.61%), whilst the worst performing sectors were Finance (-1.04%) and Property (-0.82%). The FBM Small Cap Index gained 2.85%. Average value traded on Bursa in Oct was RM2.6b vs September of RM2.5b.

Fixed Income:
The US Federal Reserve ("Fed") left its federal funds rate unchanged at 1.00% - 1.25% in November's Federal Open Market Committee ("FOMC") meeting. However, the Fed altered its assessment slightly on the economy, stated that the economy is "rising at a solid rate" and this may have likely paved the way for a possibility of rate hike in December. On the domestic front, the next Monetary Policy Committee ("MPC") meeting on 9 November will be the last MPC meeting for 2017. Bank Negara believes that the current level of the Overnight Policy Rate ("OPR") provides a degree of monetary accommodativeness and supportive of economic activities. As such, we expect Bank Negara to maintain the OPR in the upcoming MPC meeting and any rate changes would be data dependent before deciding its next course of action. Separately, we expect Federal Government's funding needs in 2018 to be same as 2017 with an estimated amount of RM40 billion. As such, we expect less surplus pressure on Malaysian government bond market. Separately, domestic corporate bond market is expected to see better supply in the pipeline in the coming months as issuers are rushing to tap the market in expectation of rising interest rates.
