ASSET ALLOCATION

Cash equivalents to 100%

Fund Objective

The Muamalat Invest Islamic Money Market Fund ("the Fund") aims to generate regular income for unit holders. Income can be distributed either in the form of cash or units.

Investment Strategy

- The Fund seeks to achieve its objective by investing up to 100% of its Net Asset Value (NAV) in short-term Islamic money market instruments.
- The Fund may invest all of its NAV in Islamic money market instruments issued by a single financial institution.
- The minimum credit rating for financial institutions in relation to Islamic money market instruments shall be "A3" by RAM or "A-" by MARC or other equivalent rating by any other similar rating agencies.
- The Fund may also invest in Islamic money market instruments with non-rated financial institutions provided that the financial institutions are either government-backed or government-linked.

Fund's Asset Allocation

- The Fund will invest up to 100% of its NAV in Islamic money market instruments issued by financial institutions.
- The allocation between the various Islamic money market instruments and the decision to invest, sell or trade are based on the decision of the fund managers who adopt an active fund management approach.

The Fund is suitable for Investors who:

- Want a portfolio of investments that adhere to Shariah principles;
- Have short-term investment horizon; and
- Have low risk tolerance.

FUND MANAGER'S COMMENTARY

- In March 2026, the United States Dollar Index (DXY) appreciated by 2.41% to 99.96, underpinned by renewed safe-haven demand amid escalating stagflation concerns. The move was primarily driven by an energy price shock and heightened geopolitical tensions stemming from the Iran conflict. In addition, shifting expectations around the Federal Reserve—particularly the potential delay or reversal of rate cuts—provided further support to the USD, reinforcing its upward momentum.
- The Malaysian Ringgit depreciated to RM4.01, breaching the RM4.00 level. The weakness was largely driven by stronger demand for the US dollar, as market participants continued to price in USD strength amid persistent inflation concerns. On the domestic front, the absence of meaningful catalysts further weighed on the currency, despite policy adjustments such as the temporary reduction in the BUDI95 fuel subsidy quota and the implementation of caps on diesel purchases in East Malaysia starting April 2026.
- Bank Negara Malaysia (BNM)'s Monetary Policy Committee (MPC) maintaining the Overnight Policy Rate (OPR) at 2.75% during its 5 March 2026 meeting. In its statement, BNM indicated that global growth would remain supported by sustained domestic demand, moderating inflation, continued strength in technology investments, and accommodative fiscal and monetary policies. However, it also highlighted that the recent conflict in the Middle East has heightened global uncertainty, with the overall impact contingent on the duration and severity of the conflict.
- A more significant macro development emerged on 31 March 2026, when Bank Negara Malaysia (BNM) released its Annual Report and Economic and Monetary Review 2025, revising its 2026 GDP growth forecast to 4.0%–5.0%. This represents a broader and more optimistic range compared to the Ministry of Finance's 4.0%–4.5% projection outlined in the October 2025 Budget.
- The upward revision reflects a stronger growth base from 2025, resilient domestic demand, a continued upcycle in investment activity, and a meaningful contribution from tourism. Notably, BNM's revised forecast range incorporates recent geopolitical developments—including the Iran conflict—as a downside risk within the band, rather than a factor necessitating a reduction in the upper bound of the growth outlook.
