ASSET ALLOCATION

FUND MANAGER'S COMMENTARY

- Global equities ended the first half of 2025 on a strong note, rebounding sharply from earlier corrections. The Dow Jones rose 4.5%, the S&P 500 gained 5.1%, and the Nasdaq jumped 6.6%. Technology stocks continued to lead the rally, with eight of the top 10 S&P 500 performers in June coming from the Information Technology sector, particularly in semiconductors and tech hardware & storage. Among sectors, Technology saw the biggest gain at +9.9%, followed by Consumer Discretionary (+7.3%) and Energy (+4.9%). Consumer Staples was the only sector to post a decline, falling 1.6%.
- Malaysian equity market experienced a downturn in June. The FBM KLCI fell 6.66%, ending the month at 1,532.96 points. The FBM Emas Shariah Index also declined sharply by 9.15%, closing at 11,438.24 points.
- In the commodity markets, crude oil prices experienced modest fluctuations. Brent crude rose by 6.31% to close at USD 66.74 per barrel, while WTI crude surged by 7.06%, settling at USD 65.11 per barrel. The price movements were primarily influenced by earlier geopolitical tensions in the Middle East. However, as the situation in the region eased, market concerns gradually subsided, contributing to greater price stability.
- According to the Department of Statistics Malaysia, Malaysia's headline inflation slowed to 1.2% in May 2025, down from 1.4% in April. Core inflation also slowed to 1.8%. The slower pace of inflation was largely driven by softer price increases in key categories, including Miscellaneous Goods & Services (3.7%), Education (2.2%), Food & Beverages (2.1%), and Housing, Water, Electricity, Gas & Other Fuels (1.7%). Additional moderation was seen in Recreation, Sport & Culture (0.9%) and Alcoholic Beverages & Tobacco (0.6%), both of which posted lower inflation rates compared to the previous month.
