FUND MANAGER'S COMMENTARY

- Moving forward, we expect a modestly weaker Malaysian government bond market in the coming quarters amid a gradual rebound in the global and Malaysian economies. The MGS curve is likely to continue to steepen as short tenure bonds and policy interest rates are expected to remain low but longer tenors are likely to price in the growth and inflation rebound and ongoing MGS and GII supply-demand concerns. While growth and inflation will recover in 2021, this recovery will be fragile as consumer sentiment and spending has remained more averse as compared to pre-pandemic days. Regardless, the possibility of another rate cut or dovish rhetoric will have a positive impact on the market.
- In view of the uncertain global economic outlook and volatile market condition, the Manager in its opinion will solely focus on capital preservation exercise and maintaining short to medium cash portfolio with approved financial institutions.
